

Live Streaming & Video Recording • Main Hall

FILMING

At Conway Hall we believe in the power of speech. We have invested in state-of-the-art filming equipment to enable companies, speakers and performers to broadcast their event live over the internet. This enables you to engage with audiences globally using a powerful online platform. Or, you can simply use the footage for your own future use.

LIVE STREAMING

An operator mixes the cameras live. Your event will be filmed from four different positions, capturing the event from different angles. The audio from the event will also be recorded. The video is recorded in 1080i HD quality and can be streamed live to your online audience. All data recorded is saved and downloaded to a DVD for your future use.

TRANSFER OF FOOTAGE TO HARD DRIVE

If your event is no longer than 9 hours, we will give you a copy of the raw footage on the day of your event. If your event is longer than this, we will transfer your video footage to a 500GB USB3 hard drive and post it you via secure delivery within 2 working days. If you bring a 500GB USB3 hard drive to the venue, you can have the raw footage on the day.

MAIN EQUIPMENT

4x HD camera (Sony EVI-H100 PTZ) video recording system
1x Camera controller • 1x USB3 DVI capture card

ADDITIONAL SERVICES

Video editing in Premiere/Final Cut Pro:

- Adding title sequences to the start and end of the video
- Adding watermarks throughout the video to highlight your brand
- Video editing to record only the event highlights
- Audio mastering and adjustment of contest levels
- Format conversion and rendering of your video post-editing

Format conversion and uploading:

The video can be optimised for hosting online, e.g. for the preferred file formats/resolutions of YouTube and similar websites. The finished video will be uploaded to your preferred cloud storage site (such as Dropbox) or uploaded to your preferred website.
